PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of experience building and modernizing production web applications using React, Next.js, Node.js, PHP, and MySQL. Solo-owned end-to-end systems including real-time analytics and eKYC workflows with a focus on performance, validation, and production readiness.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Sass, jQuery

Backend: Node.js, Express, PHP, REST APIs, Prisma, WebSockets

Database: MySQL (schema design, indexing, query optimization)

Validation & Testing: zod, Jest, React Testing Library, Postman, Load Testing

Ops & Tools: Docker, GitHub/GitLab CI, CI/CD, Webpack, Babel, npm, dotenv, PM2/nodemon

AI Tools: Cursor, Claude (Claude Code), GitHub Copilot

PROFESSIONAL EXPERIENCE

Software Developer – Product Unit – HiddenBrains Infotech, Pune *Jan 2023 – Present*

- Own end-to-end delivery of enterprise web platform features across React, Next.js, Node.js, PHP, and MySQL — from design through production deployment.
- Lead full-stack development for fintech and identity-verification products, including a solo-built eKYC platform and a real-time analytics system (see Key Projects).
- Built and maintain internal admin and operational tools enabling real-time monitoring and automation across teams.
- Introduced caching, automation, and code-level optimizations that reduced manual effort by 40% and improved system throughput.

KEY PROJECTS

HBSolutions – Enterprise Web Platform — Node.js, React, Next.js, MySQL | Sep 2023 – Present

- Developed and maintained full-stack features for a business website and lead-management platform using React, Next.js, Node.js, Express, and MySQL.
- Migrated 200+ legacy PHP pages to React/Next.js, building reusable components, integrating REST APIs, and modernizing application workflows across the platform, cutting page load time by 25%.
- Built end-to-end inquiry, contact, and case-study workflows — from React/Next.js forms and client-side validation through REST APIs, backend validation, MySQL persistence, and CRM synchronization — processing 500+ leads per month.
- Built reusable React/Next.js UI components and standardized state management using React Hooks and Context API, reducing duplicate code across modules by 30%.
- Integrated email, file uploads, CRM, cloud storage, and AI-driven services into application workflows, connecting frontend features with backend APIs and automating business operations, cutting manual follow-up work by 35%.
- Automated web-crawling services using Puppeteer and Axios to process website pages and reduce manual operational effort by 40%.

eKYC – Digital Know Your Customer Platform — Next.js, React, PHP, MySQL | Jan 2025 – Present

- Architected end-to-end eKYC workflows with secure document upload, OCR processing, liveness detection, and compliance-ready audit trails, supporting 1,000+ verifications per month.
- Built React/Next.js frontend (functional components, hooks) with multi-step onboarding and live camera capture; added Jest + React Testing Library coverage for key components, reaching 80%+ test coverage.
- Developed backend APIs for OCR and verification status management and implemented encrypted file handling and audit logging, cutting average verification turnaround time by 30%.

Real-Time Tracking & Analytics System — Node.js, WebSocket, Prisma, MySQL | Jan 2026 – Jun 2026

- Built a real-time user activity and lead analytics system to understand visitor behavior, identify potential leads, and track journeys across the application, including entry source, page navigation, and exit points, using Node.js, WebSocket, Prisma, and MySQL.
- Developed a resilient browser tracker using Web Workers and exponential backoff, achieving 98% event delivery success, 500+ events/sec, and <200ms latency in load tests.
- Optimized database schema and indexing to improve insert throughput by 40% and query performance by 60%; implemented validation and privacy-safe visitor IDs for reliable user analytics.
- Automated MaxMind GeoIP updates and added operational scripts plus a database health endpoint for monitoring and maintaining the analytics pipeline.

EDUCATION

B.E. in Electronics and Telecommunications
K.B.T College of Engineering, Nashik | Jun 2019 – Mar 2023
